

2.2. Connecting to P6 databases

- 1) Click on  button to connect to P6 database
- 2) Enter your login password for the P6 Oracle database, or select SQLite file to enter your password.

The screenshot shows a dialog box titled "Database Connection Form". It has two radio buttons: "Oracle Database" (selected) and "SQLite Database". Under "Oracle Database", there is a text field for "Database Password" and a "Connect to Oracle database server" label with the text "Connect to Oracle database server '\\localhost:1521\\XE' as database user: 'admpm\$pm'". Under "SQLite Database", there is a "Database File:" label with a text field and a "Select..." button, and another "Database Password:" label with a text field. At the bottom, there are "OK" and "Cancel" buttons.

- 3) Select schedules for comparison.

The screenshot shows a dialog box titled "Select Schedules". It contains the text "Please select schedules for comparison." Below this, there are two dropdown menus: "Base" with "UPDATE01" selected and "Revised" with "UPDATE02" selected. At the bottom right, there is a "Select projects" button.

- 4) Select reports from the reports list and click  to create reports
- 5) Use the report tabs to view the results.
- 6) Export reports to html by clicking  or to Microsoft Excel by clicking 
- 7) To clear the data and to run new comparison, click
